Learning Management System (LMS)

Counselling Process

Mode of Counselling :- Online Offline

Brief describe the provision in LMS to be used by HEI :-

The University uses a Learning Management System (LMS) to deliver online learning content, conduct live and recorded lectures, facilitate discussion forums, assignments, quizzes, learner tracking, attendance monitoring, counselling sessions, and assessments. The LMS provides secure login access to learners and faculty members and supports continuous learner engagement.

Briefly write how the Learning Management System (LMS) will ensure the following: (provide a demo link if available) :-

Assessment mechanism	The LMS supports continuous internal assessment through online quizzes, assignments, discussion forums, MCQs, descriptive tests, project submissions, and proctored examinations. Automated grading and feedback mechanisms are integrated for effective learner evaluation.
Identified technological interface and interoperability	The LMS is web-based and mobile compatible, supporting integration with video conferencing tools, digital repositories, e-content, attendance systems, examination modules, and student information systems through secure APIs and cloud-based infrastructure.
Learner's Authentication Requirements	Each learner is provided with unique login credentials including user ID and password. Authentication is ensured through secure login access, OTP/email verification, and activity tracking within the LMS.
Learner Registration - through a web application	Learners register through the university's online admission portal integrated with the LMS. After successful registration and fee payment, login credentials are generated automatically.
Active Engagement of the Learners along with Analytics for active engagement of learners and Reporting	The LMS enables active learner participation through discussion forums, live classes, quizzes, assignments, chat support, announcements, and feedback systems. Analytics dashboards monitor learner attendance, progress, participation, assignment completion, and course performance for reporting purposes.
Payment Gateway –using Digital Payment system	The University LMS is integrated with a secure digital payment gateway system (Easebuzz) that enables learners to make online payments for course enrollment, semester fees, and other academic services through UPI, debit cards, credit cards, net banking, and digital wallets. The payment system ensures secure transactions, instant payment confirmation, automated enrollment activation, and generation of digital receipts for learners through the LMS portal.
Tracking the delivery of a Course or programme	The Learning Management System (LMS) provides continuous tracking and monitoring of course/programme delivery through attendance records, learner login activity, activity completion status, assignment submissions, quiz performance, discussion participation, and progress analytics. Faculty members and administrators can monitor learner engagement, course completion, and academic progress through automated reports and dashboards to ensure effective delivery of the programme.
Technical Know-how or Skills Requirements	Basic computer literacy, internet browsing knowledge, smartphone or laptop usage, and familiarity with online learning tools are required for learners and faculty members.
